

About JJAC Programs

Would you like to plan a field trip to the John James Audubon Center at Mill Grove? JJAC would like to help supplement your science and history curriculum. Our programs are written to enhance what you are currently working on in the classroom, as a scout troop, or at home by providing a quality hands-on experience.

Groups are divided into smaller segments of between 15-20 to allow for adequate attention of your students.

We are situated on 175 acres of Forest, Fields and Creek habitat. We offer more than 5 miles of hiking trails with a pavilion, various resting areas, and picnic tables.

In addition to booking your program with qualified interpretive naturalists, your students will have access to the historic home of John James Audubon, which has been converted into a museum documenting his life and art.

SCHEDULING:

Please take a look at the information provided in this brochure before calling the Center to book your program. We will need the following information to schedule your group: Name, address, phone number, email, number of participants, program topic, arrival and departure time, and special needs/requests.

***Additional and custom programs available upon request**
